

York/Durham half-day Symposium on Mechanistic Organic Chemistry

Wednesday 19th July, 2:00–5.00 pm, C/B101

2.00: Welcome (Dr. Will Unsworth)

2.05: **Dr. Paul McGonigal** (Durham)- *"The Magnificent Seven: From Luminescent Cycloheptatrienes to Shapeshifting Cations"*

2.40: **Dr. Victor Chechik** (York)- *"Catching the invisible: short-lived free radicals"*

3.15: Coffee

3.40: **Prof. Peter O'Brien** (York) - *"Seeing is Believing: Mechanistic Interrogation of the Lithiation of N-Boc Heterocycles using in situ React IR Spectroscopy"*

4.15: **Dr. AnnMarie O'Donoghue** (Durham) - *"From Stable Carbenes to Blatter-type Radicals"*

5.00: Drinks reception

For info, or if you would like to meet any of the speakers, contact: william.unsworth@york.ac.uk

Part of the University of York organic section seminar program, sponsored by:
